Professional Summary

Results-driven Technical Operations Specialist and IT Support Specialist with proven experience supporting IT operations, SaaS platforms, and enterprise workflows in remote, hybrid, and multi-site environments. Veteran-owned professional with 15+ years of operations management, bringing reliability, documentation excellence, and operational efficiency to complex technical environments. Strong background in Microsoft 365, Azure fundamentals, system support, and process optimization, reinforced by a self-built DevForge IT lab project focused on clear, plain-language support for small teams and creators. Known for building scalable SOPs, improving service consistency, and delivering support in fast-paced, distributed settings.

Certifications

CompTIA A+ | Microsoft Azure AI Fundamentals (AI-900) | IBM Artificial Intelligence Fundamentals | IBM Big Data Foundations | Hadoop Foundations | SAP ABAP Platform Fundamentals

Additional 20+ professional certifications available on LinkedIn and portfolio.

Projects

DevForge IT - Managed IT and Content Lab – Personal Learning Project

- Built and maintain a live small business IT site as a hands-on lab to practice IT operations, SaaS support, and modern web tools, with a focus on clear, plain-language guidance for non-technical users.
 - Created practical resources for small teams, including simple security tips, onboarding checklists, and website tune-up ideas, to show real-world problem solving, documentation, and customer-focused communication.
 - Over the past month, used this project to deepen skills with Microsoft 365, Azure fundamentals, GitHub and Netlify deployment, AI tools, and content workflows, treating the site as a sandbox for continuous learning.
 - Combine video, writing, and visual design to explain IT concepts in a way that helps small businesses and creators understand how to keep their systems fast, secure, and easy to use.
 - Additional technical and content projects are available on GitHub and in my portfolio at erikcloudportal.netlify.app.
-
